

Chilakil To Go – Avondale Food Trailer – DoorDash vs In-Store Pricing

October 6, 2026 | DoorDash store 27859030 | Recommendations only – nothing changes without your approval.

Summary

Right now, **all 5 of your 5 DoorDash items** leave you with less money than selling the same item at the trailer, after DoorDash's ~30% commission. The biggest gap is the **Chilakil Burrito**: same \$12.00 price on both, so you keep only \$8.40 per DoorDash sale (**-\$3.60** vs in-store). Your #1 item, Chilaquiles, keeps \$10.50 vs \$12.00 in-store (**-\$1.50** each). The recommended prices below bring every item back to at least what you'd get at the window.

Colors: **light red** = you keep less than an in-store sale; green = OK; yellow = needs review. "vs In-Store" = what you keep after 30% minus the in-store price. Break-even = in-store price divided by 0.70; recommended = break-even rounded up to the next \$X.49 or \$X.99. Prices are the base item only; add-ons are in the next table.

¹ DoorDash's pricing page lists this item's in-store price as \$0.00; Square charges \$9.

Add-ons / proteins (same math, grouped by identical prices)

Add-on	In-Store	DoorDash Now	You Keep Now	vs In-Store	Recommended DD	You'd Keep

Popularity (in-store Square sales, last 30 days)

Chilaquiles is your #1 item – 1,270 sold in-store in the last 30 days. Next among items also on DoorDash: Soda 211, Chilakil Burrito 59, Chilakil Torta 35, Keto Chilaquiles 7. These are in-store counts, shown only to tell you which items matter most; DoorDash item counts were not available, so no monthly or yearly loss is estimated.

Every 10 DoorDash Chilaquiles orders at the current price = \$15.00 less than 10 in-store sales (10 × \$10.50 kept vs 10 × \$12.00; base price only, before add-ons).

Notes & things to check

- Torta data entry:** DoorDash's menu-pricing page shows the Chilakil Torta's in-store price as \$0.00, while Square charges \$9. Please check that entry.
- DoorDash "Menu pricing" page** shows no in-store menu uploaded and current markup "--" (its per-item "in-store" fields just repeat the DoorDash prices, e.g. Chilaquiles \$15, not the \$12 Square price). DoorDash may offer a 0% markup program; we previously advised against accepting 0% markup because of the ~30% commission.
- Commission:** Avondale's rate has not been verified; 30% is assumed, per Victor. (Glendale measured about 29.4% on delivery plus 6% on pickup.)
- Not true profit:** food cost is not included. These numbers compare what you keep with an in-store sale. Card fees and tax are also excluded.
- In-store prices** come from actual Square sales Sep 6 – Oct 6, 2026 (the Square catalog wasn't readable). Any item that didn't sell in that window isn't shown.
- Customers may order less at a higher price.** Consider phasing increases on the top sellers (e.g. Chilaquiles) and watching DoorDash order counts for 2–4 weeks.
